

## 8 N/O and N/C output module, 2 inputs for temperature sensors, 2 analogue outputs with 230Vac power supply

Module with 8 outputs for dry contact zone valves (NO/NC) ideal for managing hydronic heating and cooling systems and controlling the thermostats of underfloor systems.

### Description

The module is equipped with **8 independent relay outputs** and has **2 analog inputs** that can be used to read an NTC resistive sensor.

The relay outputs of the device can be freely controlled by the Z-Wave network (e.g. MyVirtuoso Home) and can be used for different purposes, e.g. control of valve actuators of an underfloor heating system, on/off control of light, etc.

The inputs are analog to allow the module to interface with simple **temperature sensors** (NTC, etc.).
