Description

The **energy consumption meter** is designed for real-time measurement of all electrical parameters for low voltage (LV) systems. Thanks to the **Modbus protocol**, MyPM-01MB can easily be configured and controlled remotely via the **MyVirtuoso Home App** or the **Contact Pro cloud platforms** (license sold separately). In fact, it is integrated with the MyVirtuoso Home HEMS thanks to the **MyMB interface/actuator for ModBus systems (Code 01335-2086-00)**. In this way all the information will be sent to the HUB, which will show the values ??to the user through the application.

It has numerous advantages such as high precision, good electromagnetic compatibility (EMC) and easy installation.
