### Description

The **door/window sensor** is a home security device: when the relevant door or window is opened, the sensor will immediately send a notification to the MyVirtuoso Home App, allowing for timely intervention in the event of an intrusion.

Thanks to the HEMS MyVirtuoso Home, this sensor can be used in many other ways: for example, by combining it with a **TTDZ3 digital thermostatic head (Cod. 01335-1011-00)**, it will be possible to set up an automation that automatically turns off the radiator when the window is opened, thus avoiding unnecessary waste of energy!
