Description

The **IR controller** monitors the operation and programming of **heating and cooling systems** such as air conditioners, heat pumps or stoves. With the IR controller, integrated within the MyVirtuoso Home system, it is possible to turn the connected systems on or off, activate automatic thermoregulation rules, and efficiently manage consumption. Everything happens via the free MyVirtuoso Home App.

The IR controller is equipped with the "**learning**" function, which records the commands of air conditioners, heat pumps or stoves, to replicate them from the App.
