Description

The device is on its way to our warehouse, therefore all

orders received will be managed as soon as we have the material available. Indicative date of availability: 20 February 2024.

With this Digital Thermostatic Head KIT you can **manage and program your radiators room-by-room**, optimizing the temperature, avoiding waste and saving up to 30% on bill costs.

All TTD101s are equipped with **temperature sensor** capable of independently regulating the radiator on which they are installed, also capable of detecting the thermal shock caused by opening a window and reacting by switching off the heating.

All Digital Heads have a **standard M30*1,5 connection**. If your valve with thermostatic option does not fall within this type of connection, we recommend that you look at our [selection of adapters](#); these will allow you to install the TTD101 on your thermostats.

What you can do with TTD101?

- **Manage and monitor** the temperature in every room of your home.
- **Program the radiator** on which the head is installed daily and/or weekly.
- **Automatically turn off** the heating when the head detects a window opening.
- **Keep consumption to a minimum** during holiday periods, thanks to the specific setting.

Contenuto della confezione:

- 3x TTD101 **01333-0030-00**.
- 3x Danfoss RA Adaptor.
- 3x Danfoss RAV Adaptor.
- 3x Danfoss RAVL Adaptor.

Note: The TTD101 head cannot be associated with the TTD2000 wireless thermostats.
