Description

The **multi-instance Modbus RTU converter** allows integration of heat pumps, fan coils, inverters, and other Modbus devices into an IP network by converting the Modbus RTU protocol into Modbus TCP/IP. Thanks to this device, it is possible to network equipment that cannot be directly reached by the Z-Wave network of the MyVirtuoso Home HUB, ensuring a stable and reliable connection.

Ideal for scenarios requiring precise and secure control of Modbus devices, the converter ensures efficient and uninterrupted communication.
