Description

Energy consumption meter that can be installed on DIN rail. Remotely monitor the energy consumption of utilities and production lines.

Thanks to **MQTT Wi-Fi connectivity**, the MyPM-03W can easily be configured and controlled remotely via the **Contact Pro cloud platforms** (license sold separately).

The real-time vision of the measured data will help to make informed decisions to make the industrial environment more energy efficient, and to monitor the correct functioning of power lines (when anomalies are detected, the device sends alarm notifications to the platform) .
