### Description

**MyGMS** is the device designed for **gas supply** services where an hourly transfer of consumption is required. MyGMS is an **ultrasonic gas meter** (therefore with low insertion loss) ideal for prepaid gas supply services (**Pay per Use**) thanks to the shut-off valve capable of interrupting the supply when the maximum budget is reached or in case abnormal data (possible loss).

**MyGMS** is the ideal device also for **Building Automation systems** where hourly consumption monitoring is required.

### Why choose SmartDHOME meters?

**Our ultrasonic meters** are devices dedicated to all professionals who want to provide an excellent customer experience to their customers. Below are the main reasons why you should choose them.

- They maintain the same **millimeter accuracy** throughout the life of the product. This leads to precise measurements over time.
  - The detection of anomalies, which negatively affect the measurement, is done quickly and repairs will be just as fast.
  - Data collection is carried out remotely, this allows an efficient redistribution of resources.
  - They have no mechanical parts, therefore **they are not affected by wear** and require minimal maintenance.
-
