Description

The **MyPM-48MBTA power meter** is designed to acquire electrical parameters in real time within a telecommunications system. It offers numerous functions such as remote measurement, remote indication, remote control, data storage, processing, and interaction. Additionally, it

can measure DC energy consumption, providing detailed data about the station to which it is connected.

MyPM-48MBTA is integrated with the MyVirtuoso Home HEMS system via the [MyMB interface/actuator for ModBus systems \(Code 01335-2086-00\)](#). This allows all information to be sent to the HUB, which displays the values to the user through the application.
