Description

[Visit the product page](#) [FAQ](#) [Contact Us](#)

The **PT100 temperature transducer** is an accessory from the MyVirtuoso Home line, capable of detecting extreme temperatures and converting the value into a 0–10 Vdc electrical signal.

The device is integrated with the MyVirtuoso Home HEMS via the [sensor for NO/NC contacts and temperature input for optional sensors and 0–10 Vdc \(Code 01335-1362-00\)](#). This way, all information is sent to the HUB, which displays the values to the user through the application.
