

Ultrasonic heat/cool energy meter MyHCM2 DN15, average flow rate 1.5 m³/h, with Modbus interface and MID certification

Smartdhome heat/cool meters from the MyHCM2 series, MID certified, are ideal for thermal energy metering—both heating and cooling—and use ultrasonic technology to ensure maximum reading stability over time.

Description

The Smartdhome heat/cool meters of the **MyHCM2** series, **MID** certified, are ideal for thermal energy metering, both heating and cooling, and use **ultrasound** technology to ensure maximum reading stability over time.

Thanks to MID certification, they comply with the legal measurement accuracy requirements for direct cost allocation systems in residential settings.

They measure energy consumption in **heating**, **cooling**, and combined heating/cooling applications.

The **MID** certification, high frequency flow and temperature measurement, and compact, robust housing make them an excellent choice for **user satellite boxes** where individual thermal energy metering is needed.

All flow calculation and measurement circuits are designed to offer exceptional **precision** and **reliability**.

The Heat/Cool meters can be read via the HEMS system App [MyVirtuoso Home](#) thanks to the MyMB interface for ModBus systems (Code 01335-2085-00).

Main Features

MID certified (2004/22/EC).

Compliant with standard EN13757.

Modbus communication interface.

Low pressure losses.

Battery life up to 22 years.

Wide dynamic measurement range.

Measurement accuracy.

Installation in any position.

Long product life, as there are no moving parts.

Automatic self-diagnosis and fault detection.
