Description

The **ultrasonic water meter** for hot and cold water is a device designed to detect the volume of water consumed by each individual user that uses ultrasound technology for accurate and reliable measurement. It has no moving parts, so it is less subject to wear and ensures greater accuracy and stability for the entire duration of the measurement and the life of the product.

Why choose SmartDHOME meters?

Our ultrasonic meters are devices dedicated to all professionals who want to provide an excellent customer experience to their customers. Below are the main reasons why you should choose them.

- They maintain the same **millimeter accuracy** throughout the life of the product. This leads to precise measurements over time.
- The detection of anomalies, which negatively affect the measurement, is done quickly and repairs will be just as fast.

- Data collection is carried out remotely, this allows an efficient redistribution of resources.
- They have no mechanical parts, therefore **they are not affected by wear** and require minimal maintenance.
