The wireless LoRa module for Modbus devices extends Modbus communication range up to 300 meters in open field. It is ideal for applications in both residential and industrial settings where long-range Modbus connectivity is required.

This device integrates seamlessly with the MyMB interface/actuator for Modbus systems ([Code 01335-2085-00](#)), enabling connection to heat pumps, fan coils, inverters, and more—while ensuring reliable communication with the MyVirtuoso Home HUB.
